

COMPREHENSIVE MODERATION REPORT (3 sections)

SECTION 1 (Pre-assessment): Jointly completed by the Examiner & Subject Moderator/s

ASSESSMENT:	First semester: X	Second semester:	Full year:	YEAR:	2026
Examiner:	Eve Examiner	Assessment No:	Test 1		
Internal Moderator:	Ian Internal	HEQF level of subject:	6		
External Moderator:	Xena External	Level of subject: (e.g. YR 1, YR 2 etc):	YR 2		
Subject name:	Intro	Subject Code:	CSC101		
Qualification	National Diploma: Emergency Medical Care	Qualification code:	D2EMCA		
Assessment Date:	12/03/2026				

Types of questions (or project assessment criteria) used in this assessment task	% Weighting across task		Poor	Adequate	Good
Simple recall of facts, simple processes and short definitions for example typical multiple choice questions which require students to, for example, name a process, component (the upper arm muscle is ...) or amount (the longest river in Africa is ...) from memory without having to perform any interpretation.	20%	Alignment with HEQF level descriptors	0	1	2
Complex recall of extended definitions, complex processes and explanations which would also not require interpretation but the question would require a longer more detailed answer, for example giving a related account of steps to set up a business or perform a fault analysis.	10%	Alignment with subject outcomes	0	1	2
Application of knowledge to solve simple, familiar problems which would involve few variables and the task would be very similar to what had been taught (for example a simple calculation or case study analysis). The student would still, however, be required to analyse the problem into its components and to synthesise knowledge to reach a solution, though at a simple level.	30%	Integration of critical cross-field outcomes	0	1	2
Application of knowledge to solve more complex and unfamiliar problems. This is distinguished from more simple problem solving where there are more variables and/or the student has to apply their knowledge to a new context, rather than one that has previously been taught. Furthermore, the student would be required to perform a more difficult analysis of what the problem involves and what knowledge would need to be synthesised to address a solution (this could be a complex, multi-stage calculation or a more challenging case study).	20%	Clarity of instructions and questions	0	1	2
Simple critical analysis in which the student is asked to pass judgement, give reasoned opinion on and make suggestions towards, for example, an issue, procedure or approach with reference to the typical knowledge and procedures of the field. This could be done through asking students to comment on issues or approaches in a short case study. At lower levels (for example year 1) this would typically be similar to what has been taught involving relatively few variables.	15%	Accessibility of language	0	1	2
More complex critical analysis would involve students' operating in a relatively unfamiliar or new context with an increased number of variables.	5%	Time allocation	0	1	2
Total	100%				

[Adapted from Bloom's taxonomy to incorporate the SAQA level descriptors]

Table: Levels of complexity of assessments

1.	Was the assessment task moderated before the students completed the assessment?	Yes
	Comments: Looks fine.	
2.	Is the assessment task (test, oral, practical, project) and memo/assessment criteria set at an appropriate HEQSF level?	Yes
	Comments: Looks fine.	
3.	Is the allocation of marks in proportion to the complexity of the questions?	Yes
	Comments: Looks fine.	

DECLARATION: Consensus has been reached between the Examiner and the moderator/s		
NAME: Examiner (please print)	SIGNATURE	DATE
Eve Examiner		09/10/2026
NAME: Internal Moderator (please print)	SIGNATURE	DATE
Ian Internal		09/10/2026
NAME: External Moderator (please print)	SIGNATURE	DATE
Xena External		09/10/2026

SECTION 2 (Post-assessment): Jointly completed by the Examiner & Subject Moderator/s

CSC101	Intro		
Total number of (reg.) candidates	30	No. of candidates absent:	26
Highest mark obtained:	72.0%	No. of passes:	2
Percentage pass:	50.0%	Average mark (%):	51.4%
Type of assessment:	Written test		

1.	Which types of questions/project assessment criteria (see Table 1) did most students not meet?
	<i>Comments:</i> Examiner answer q1.
2.	Comment on the pass-rate (above), and any other indicators (e.g. student evaluations) as to how students fared in this assessment.
	<i>Comments:</i> Examiner answer q2.
3.	Have the pass-rate and other indicators changed significantly compared to previous assessments this semester?
	<i>Comments:</i> Examiner answer q3.
4.	What was done differently in the approach to this subject this semester/year, and how effective was it?
	<i>Comments:</i> Examiner answer q4.
5.	What should be done differently next time this subject is taught and assessed?
	<i>Comments:</i> Examiner answer q5.
6.	Is the marking of the assessor up to standard, accurate, fair, consistent?
	<i>Comments:</i> Marking is consistent and fair.
7.	Is the marking of the assessor recommended for acceptance?
	<i>Comments:</i> Yes, recommended for acceptance.
8.	Please comment on the following:

The extent to which the assessment tasks cover the outcomes/content of the subject, in proportion to its relative importance.

Moderator comment on coverage.

Whether the assessment tasks are at the appropriate level of difficulty (standard) for the exit level of the subject.

Moderator comment on difficulty.

Whether the assessment tasks have industry/professional relevance.

Moderator comment on relevance.

The reliability of the assessment process (i.e. consistent marking, accurate results, detailed memorandum, comprehensive assessment criteria).

Moderator comment on reliability.

The validity of the assessment methods and instruments (comment on whether it measures the selected content/practical skills and learning outcomes it intends to).

Moderator comment on validity.

The quality of the feedback given to the students (not required for final summative assessment).

Moderator comment on feedback.

Are any general adjustments of the marks recommended?

No

Specify:

DECLARATION: Consensus has been reached between the Examiner and the moderator/s

NAME: Examiner (please print)	SIGNATURE	DATE
Eve Examiner		09/10/2026
NAME: Internal Moderator (please print)	SIGNATURE	DATE
Ian Internal		09/10/2026
NAME: External Moderator (please print)	SIGNATURE	DATE
Xena External		09/10/2026

SECTION 3: To be completed by the External Moderator (where applicable)*[Sections 1 and 2 to be included for the external moderator]***Please comment on the following:***The extent to which the assessment tasks cover the outcomes/content of the subject, in proportion to its relative importance.*

External comment on coverage.

Whether the assessment tasks are at the appropriate level of difficulty (standard) for the exit level of the subject.

External comment on difficulty.

Whether the assessment tasks have industry/professional relevance.

External comment on relevance.

The reliability of the assessment process (i.e. consistent marking, accurate results, detailed memorandum, comprehensive assessment criteria).

External comment on reliability.

The validity of the assessment methods and instruments (comment on whether it measures the selected content/practical skills and learning outcomes it intends to).

External comment on validity.

The quality of the feedback given to the students (not required for final summative assessment).

External comment on feedback.

How the qualification compares to best practice/innovative practice nationally and internationally

External comment on best_practice.

The extent to which the qualification standards are in accordance with HEQSF, SAQA level descriptors and professional/industrial council standards and/or significant employer requirements

External comment on standards.

Any recommendations for changes and/or improvements in the best interests of the qualification, CPUT staff and ensuring the capability profile of our students.

External comment on recommendations.

Are any general adjustments of the marks recommended?**Yes**

Specify: Add 2% to all marks.
