STAFF BRIEFING

Digital Examination Moderation System

Moderating assessments online, from draft paper to signed, archived report

Cape Peninsula University of Technology

[Presenter name] · [Date]

[Site address]

THE REASON

Why we are moving moderation online

Today

- Papers, memos and marks travel by e-mail and in folders
- Hard to see where an assessment is stuck
- Deadlines are missed or discovered late
- Signatures and comments are scattered
- The final report is assembled by hand

With the platform

- One record per assessment, start to archive
- Everyone sees whose turn it is
- Deadlines and reminders built in
- Digital signatures, confirmed with your password
- One signed PDF in the official Appendix 2 layout

OVERVIEW

The process at a glance

1

Section 1

Examiner

Details, weightings, paper and memo

2

Gate 1

Internal moderator

Reviews the paper; approves or sends back

3

Section 2

Examiner

Marks, statistics, answers

4

Gate 2

Internal moderator

Final review and signature

5

Gate 3

External moderator

Only if assigned: Section 3

6

Archive

Examiner + HOD

Sign Section 3; PDF archived

Before the assessment

Pre-moderation (steps 1–2) is finished 14 days before the assessment date.

After the assessment

Post-moderation (steps 3–6) is finished 14 days after the assessment date.

ROLES

Who does what

Examiner

- Sets up the assessment
- Section 1, paper and memo
- Uploads marks (Section 2)
- Signs Section 3

Internal moderator

- Reviews the paper (Gate 1)
- Rates the criteria 0/1/2
- Final review (Gate 2)
- Comments in the Word paper

External moderator

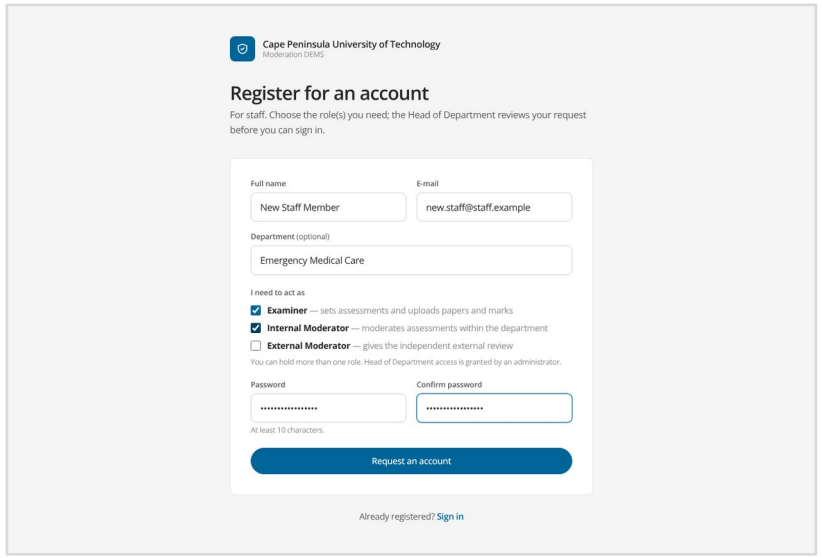

- Sees the record only after Gate 2
- Completes Section 3
- Optional step

Head of Department

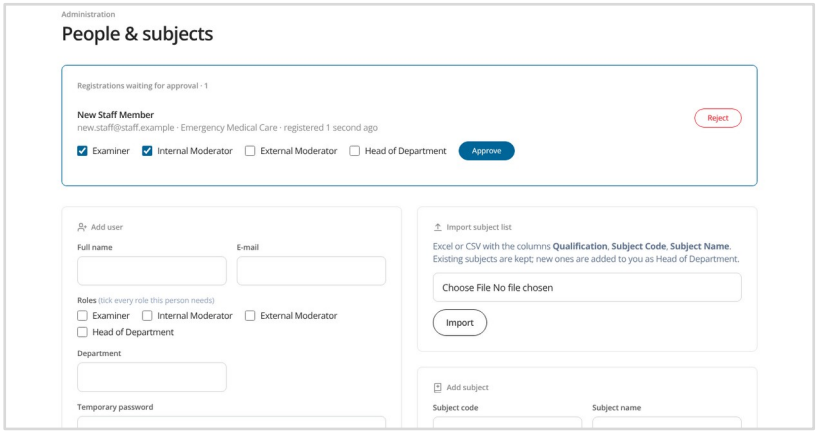

- Approves staff registrations
- Manages users and subjects
- Signs Section 3
- Receives the final PDF

Staff can hold several roles. Nobody moderates their own assessment.

Getting an account

Staff register with their role(s)

The HOD approves in Admin

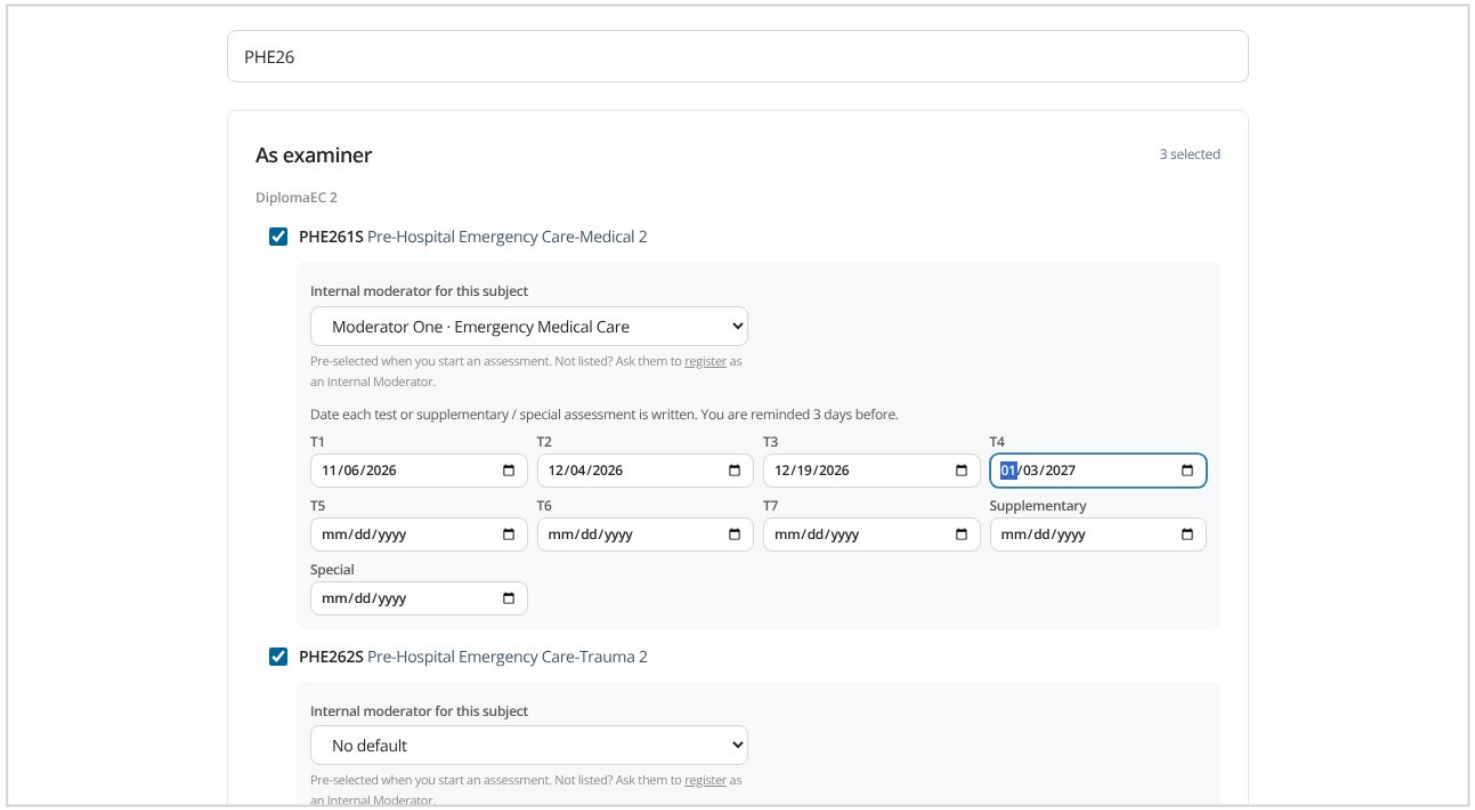

1. Click Register on the sign-in page

2. Choose Examiner, Internal or External Moderator

3. The HOD approves (and can change the roles)

4. Sign in; change your password any time

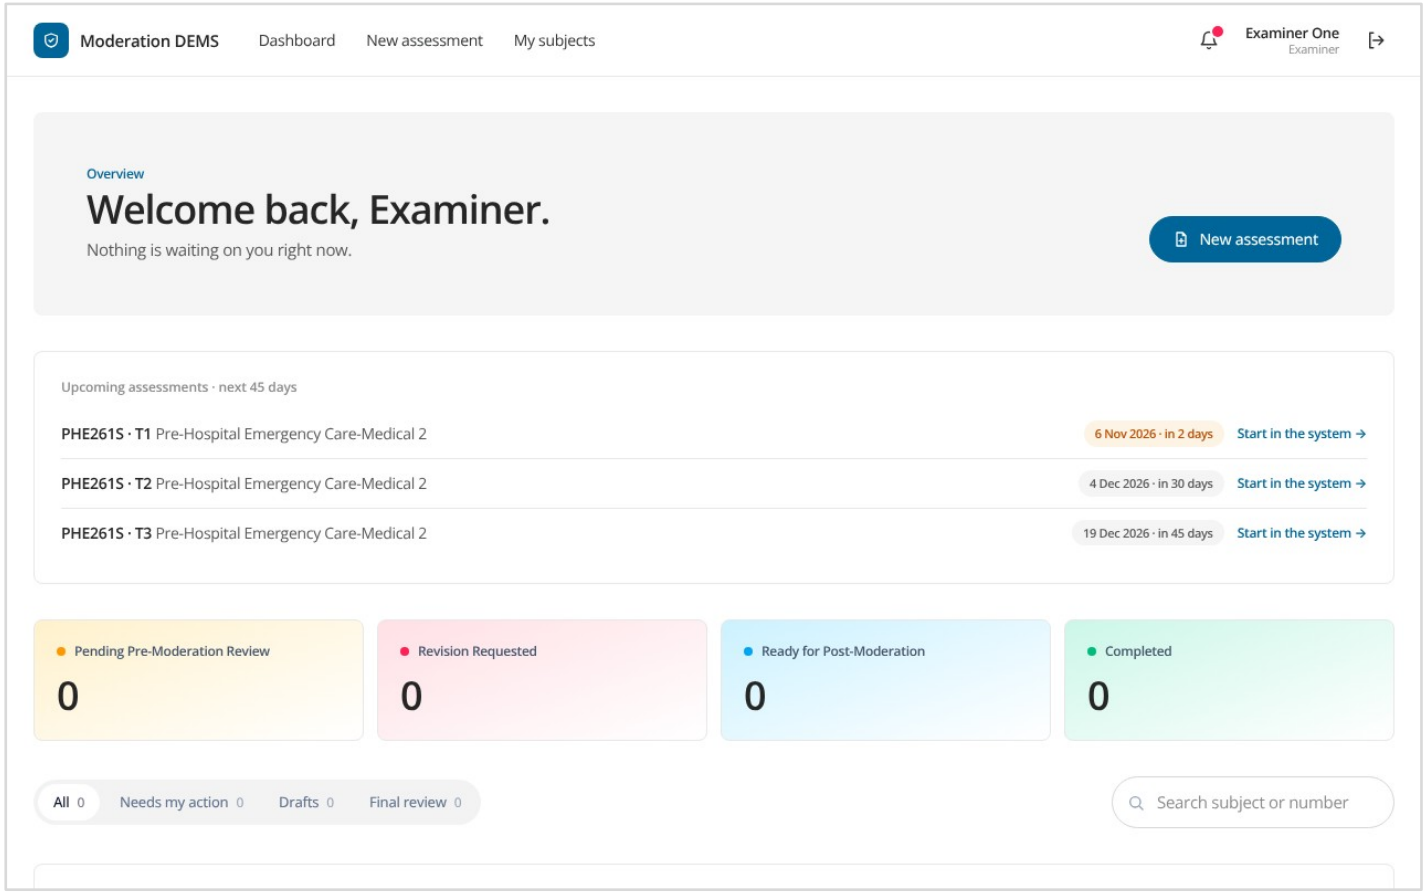

My subjects and test calendar

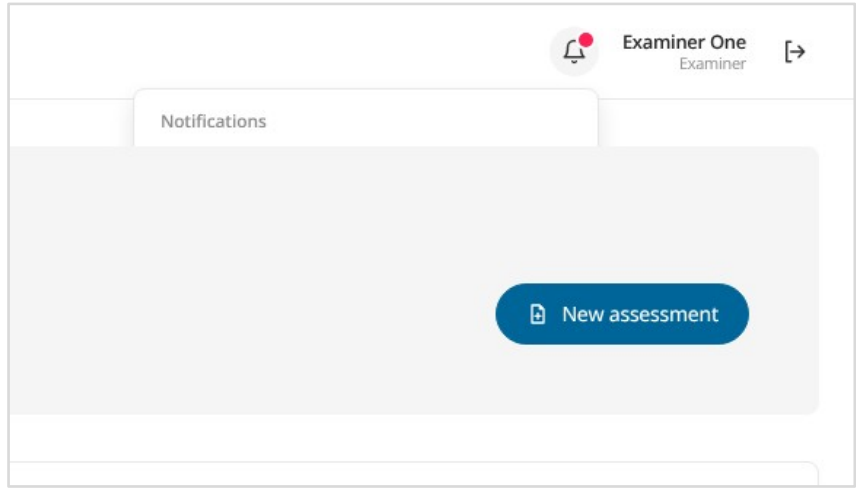

- Tick the subjects you are responsible for
- Examiners can only start assessments for their own subjects
- Choose your usual internal moderator for each subject
- Enter the date of each test: T1–T7, Supplementary and Special
- The dates drive your reminders and deadlines

STAYING ON TRACK

Your dashboard and reminders

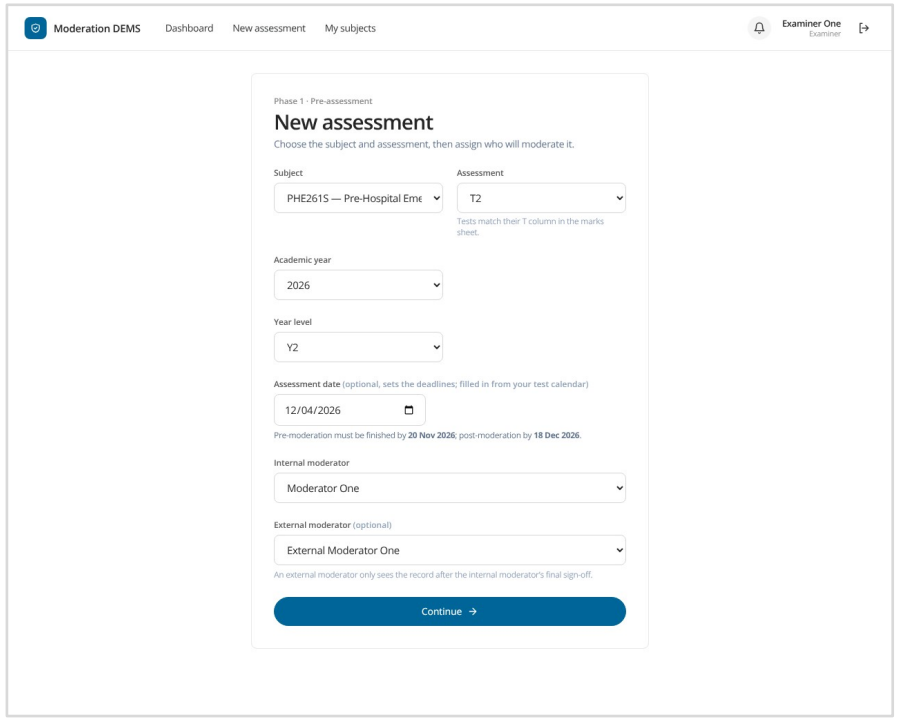

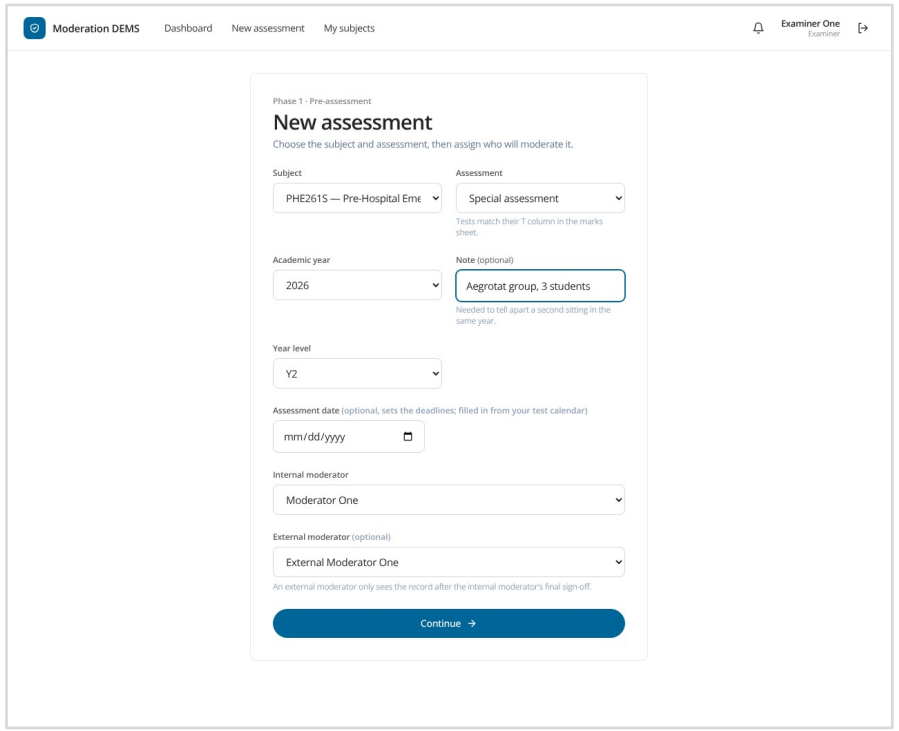

- Upcoming assessments for the next 45 days
- Reminders from 3 days before
- Due dates turn amber, then red when overdue

EXAMINER

Starting an assessment

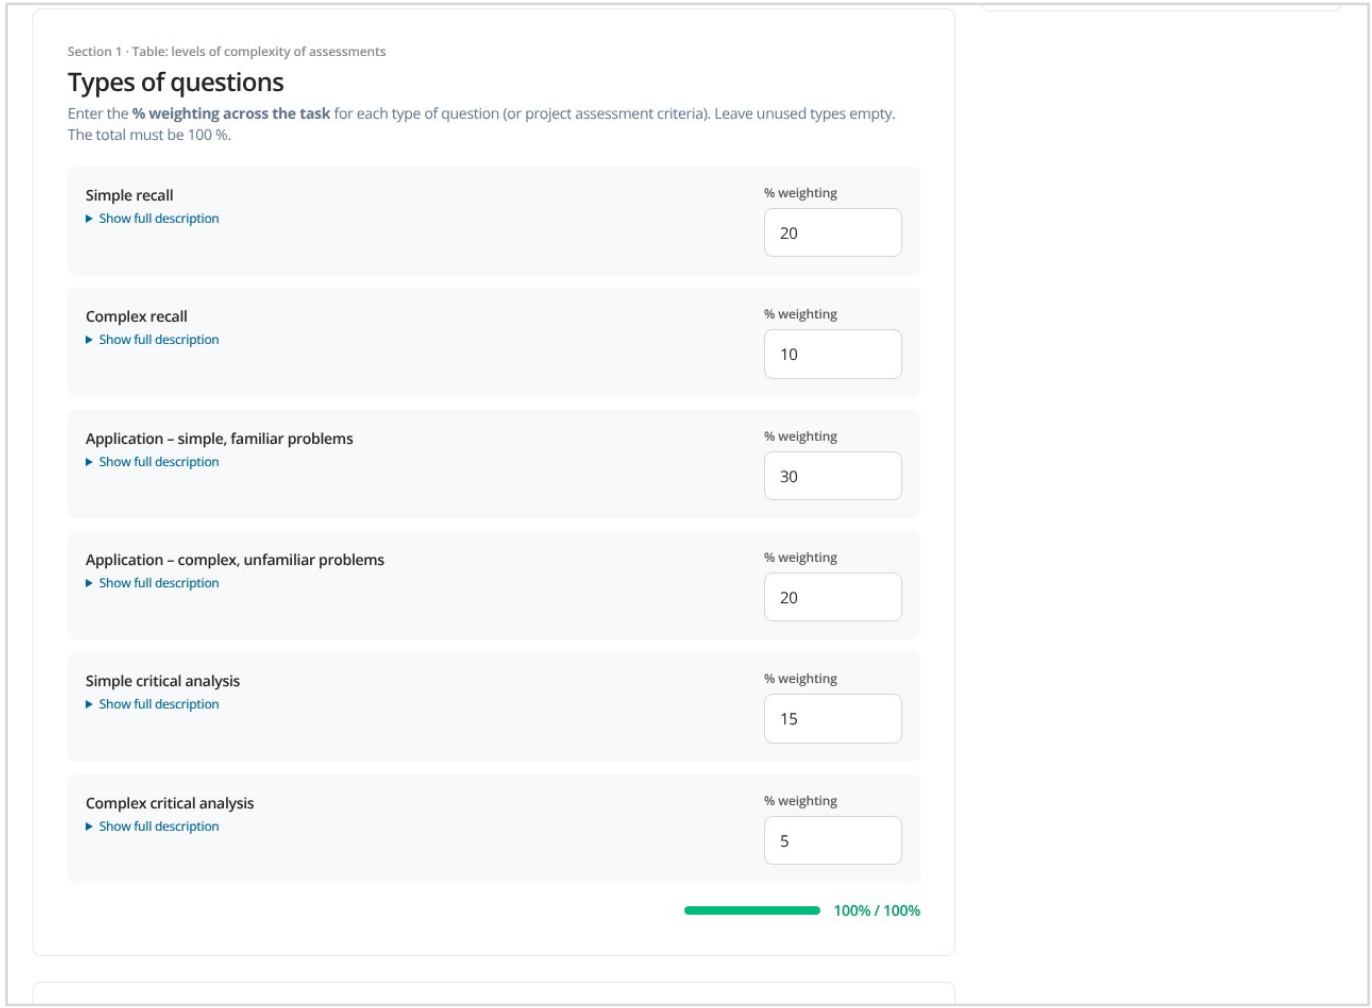

- Subject and assessment (T1–T7, Supplementary, Special)
- Academic year and year level
- Date: sets the deadlines
- Internal moderator pre-selected
- Optional external moderator

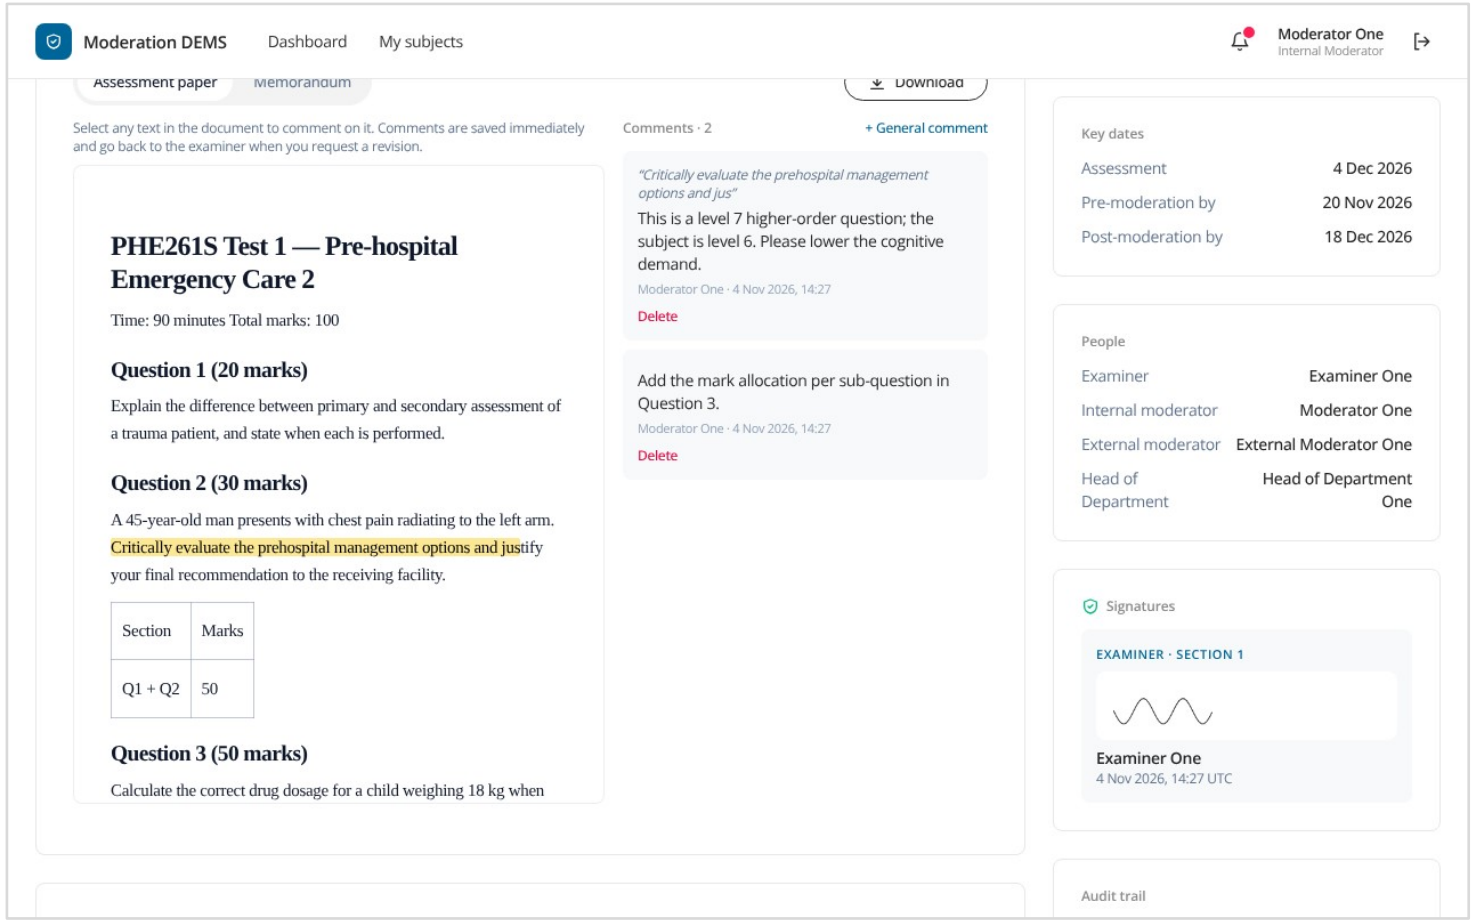

EXAMINER

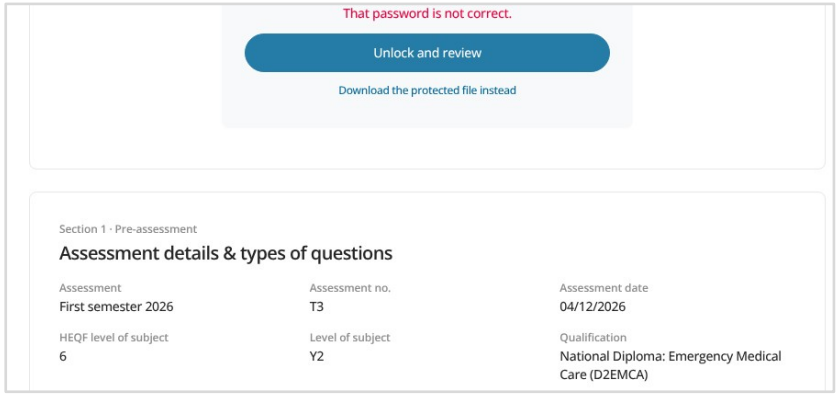

Section 1: the examiner’s part

- Assessment details as on the official form
- Weighting of the six question types, totalling 100%
- Upload the paper (Word or PDF) and the memorandum
- Sign with your drawn signature and password

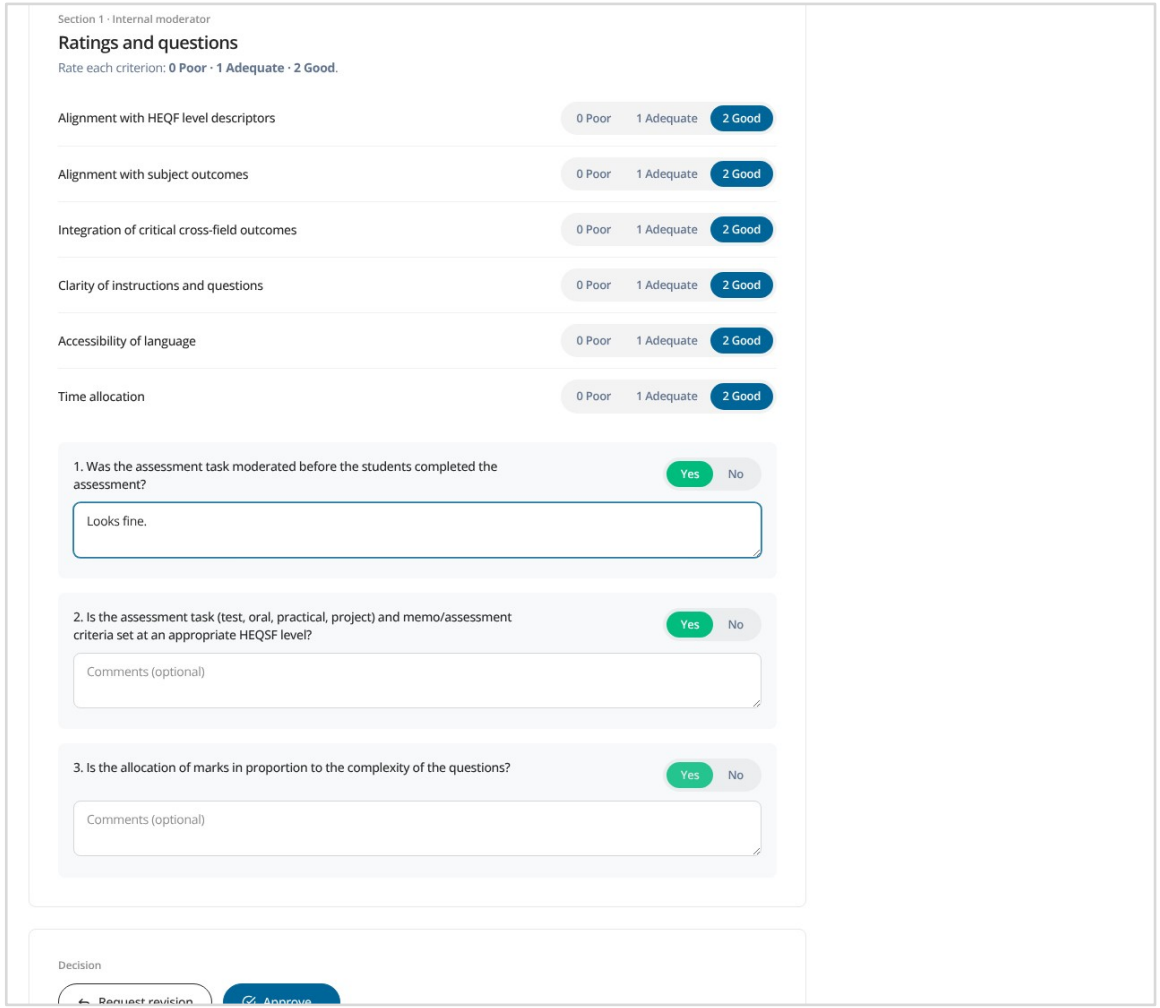

Gate 1: reviewing the paper in the browser

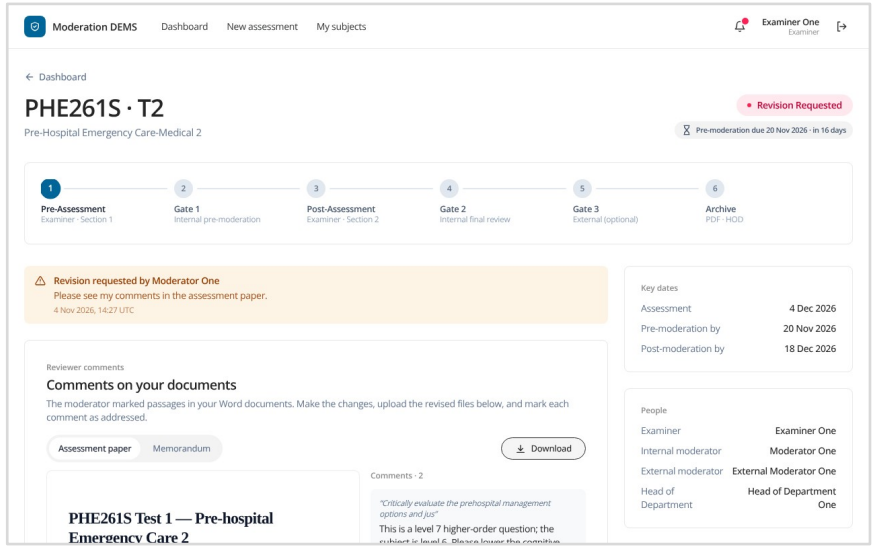

- Select text, add a comment
- Comments return to the examiner
- Protected Word papers unlock in your browser

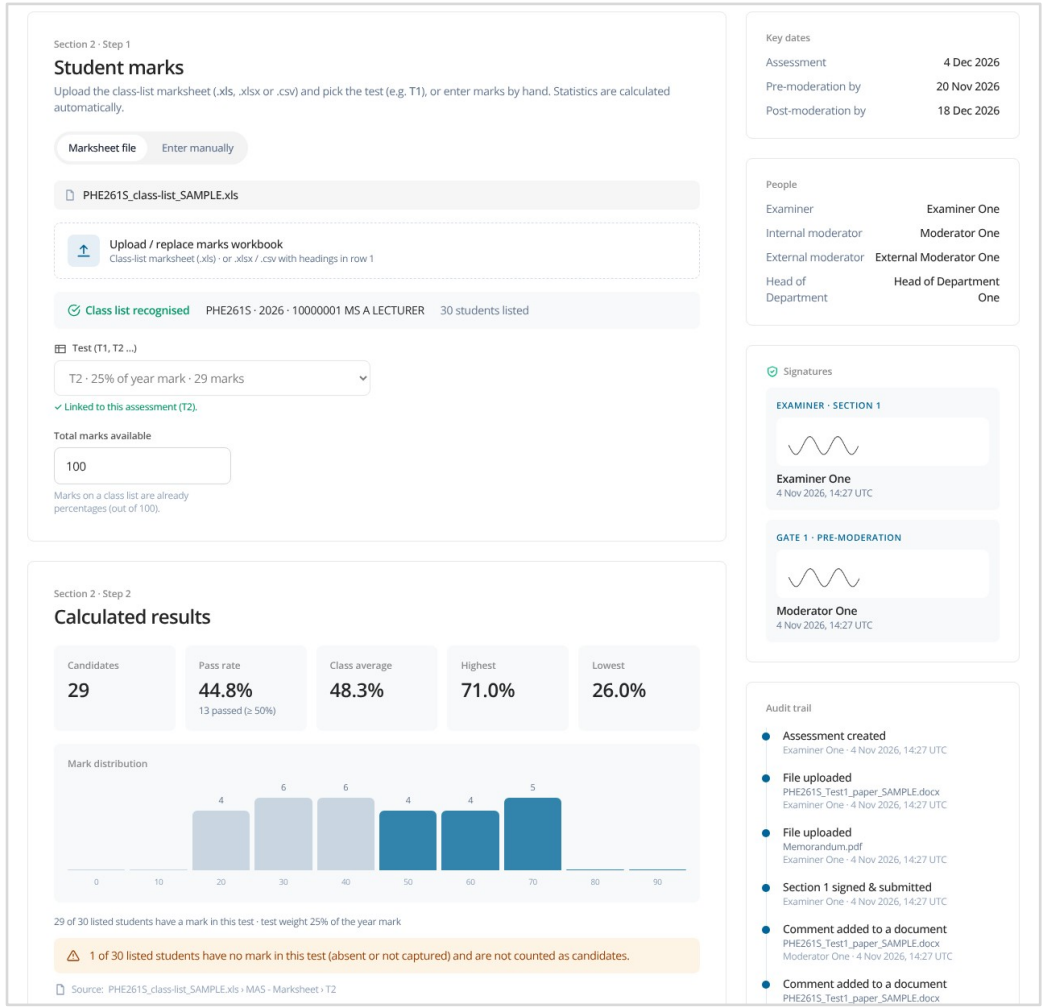

Gate 1: ratings and decision

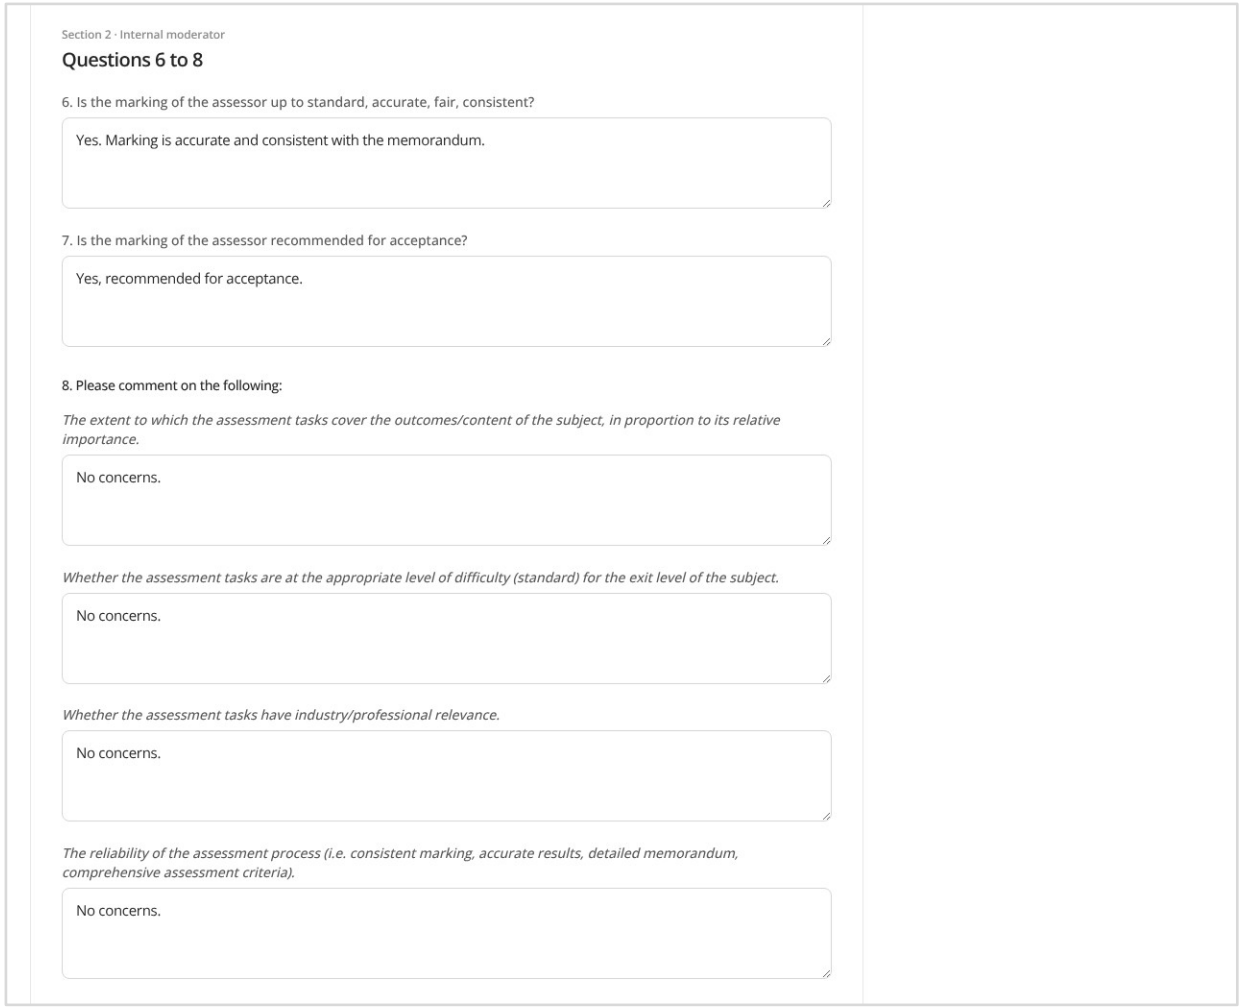

- Rate six criteria: 0 Poor, 1 Adequate, 2 Good
- Request revision, or approve with consensus and signature

Section 2: marks and statistics

- Upload the class-list marks sheet (.xls, .xlsx or .csv)
- The assessment number selects its own column (T2 → T2)
- Statistics are calculated automatically
- Registered and absent numbers, then five short questions
- Sign and submit for final moderation

Gate 2: final review

Section 2 · Internal moderator

Questions 6 to 8

6. Is the marking of the assessor up to standard, accurate, fair, consistent?

Yes. Marking is accurate and consistent with the memorandum.

7. Is the marking of the assessor recommended for acceptance?

Yes, recommended for acceptance.

8. Please comment on the following:

The extent to which the assessment tasks cover the outcomes/content of the subject, in proportion to its relative importance.

No concerns.

Whether the assessment tasks are at the appropriate level of difficulty (standard) for the exit level of the subject.

No concerns.

Whether the assessment tasks have industry/professional relevance.

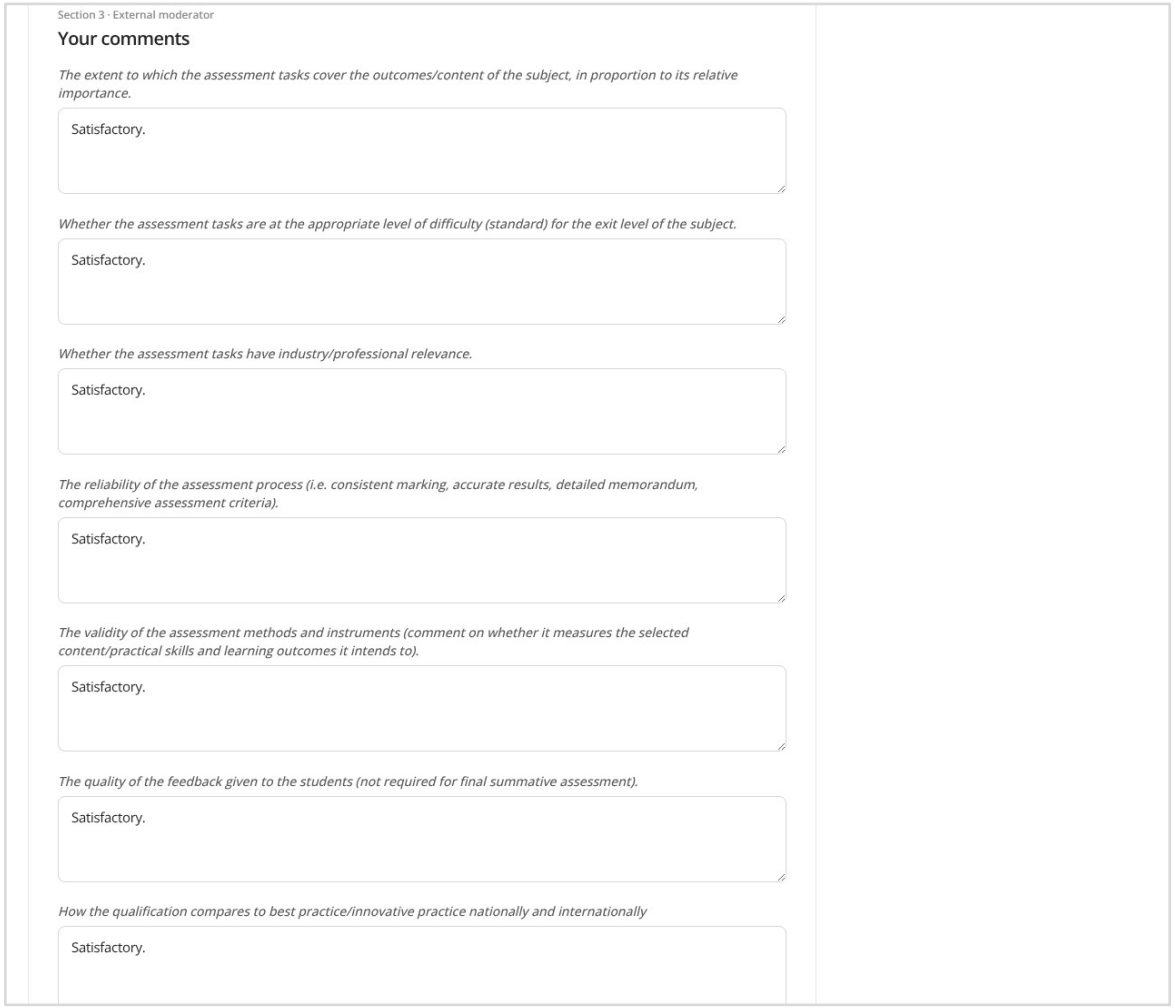

No concerns.

The reliability of the assessment process (i.e. consistent marking, accurate results, detailed memorandum, comprehensive assessment criteria).

No concerns.

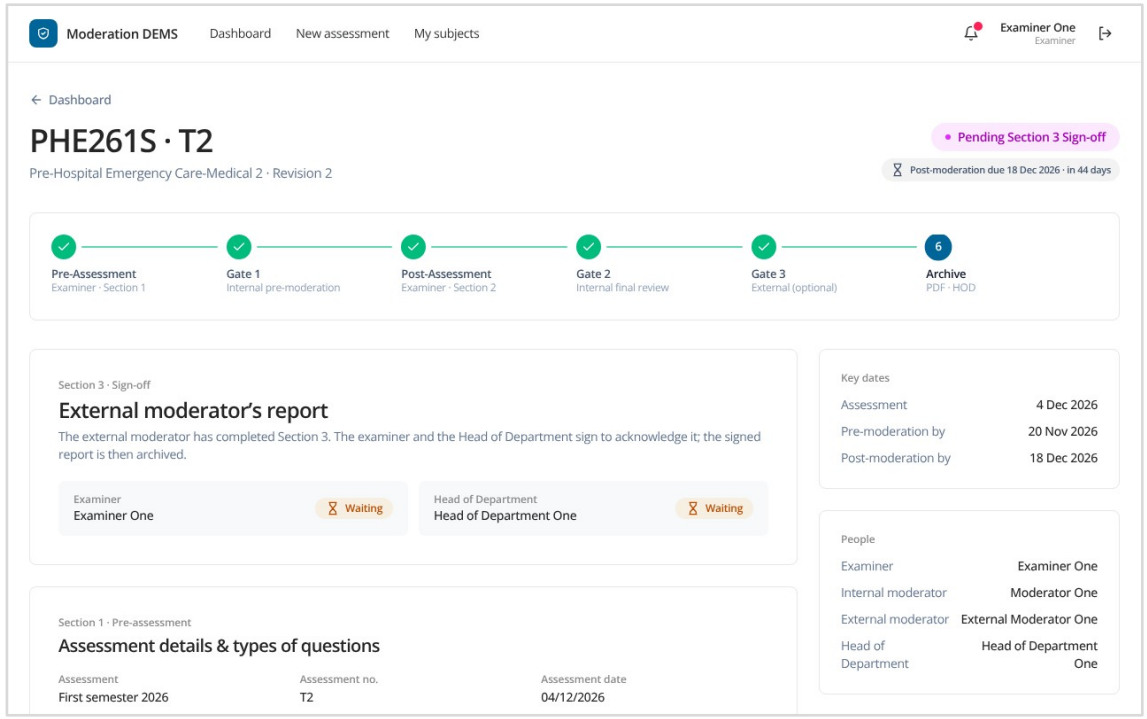

- Answers to Section 2 questions 6–8
- Comments on coverage, difficulty, reliability, validity
- Any adjustment of marks recommended
- Consensus and signature
- Completes the record when there is no external moderator

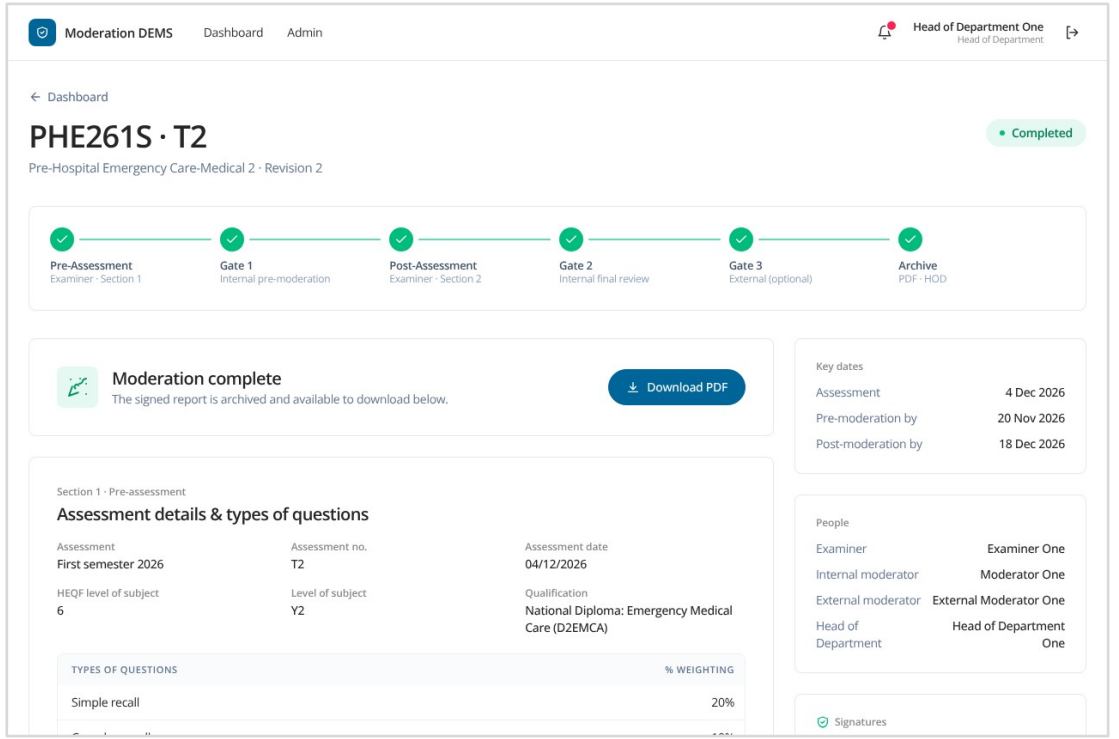

External moderator: Section 3

- Visible only after the internal moderator's final sign-off
- Comments on standards and best practice
- Recommendations and any mark adjustment
- Signs Section 3

Sign-off and completion

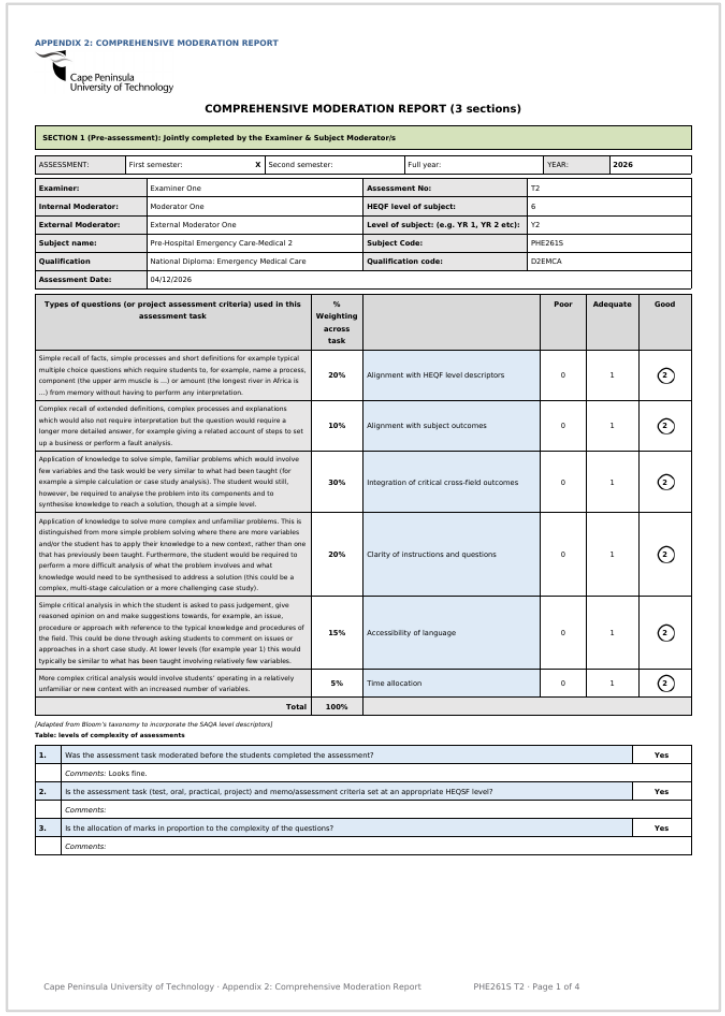

- The examiner and the Head of Department sign Section 3 (the same person signs twice if they hold both roles)
- The last signature completes and archives the record; the signed PDF can be downloaded

APPENDIX 2

The final report: the official CPUT form

APPENDIX 2: COMPREHENSIVE MODERATION REPORT

Cape Peninsula University of Technology

COMPREHENSIVE MODERATION REPORT (3 sections)

SECTION 1 (Pre-assessment): Jointly completed by the Examiner & Subject Moderator/s

ASSESSMENT:	First semester:	x	Second semester:		Full year:	YEAR:	2026

Examiner:	Examiner One	**Assessment No:**	T2
Internal Moderator:	Moderator One	**HEQF level of subject:**	6
External Moderator:	External Moderator One	**Level of subject: (e.g. YR 1, YR 2 etc):**	Y2
Subject name:	Pre-Hospital Emergency Care-Medical 2	**Subject Code:**	PHE261S
Qualification	National Diploma: Emergency Medical Care	**Qualification code:**	D2EMCA
Assessment Date:	04/12/2026		

Types of questions (or project assessment criteria) used in this assessment task	% Weighting across task		Poor	Adequate	Good
Simple recall of facts, simple processes and short definitions for example typical multiple choice questions which require students to, for example, name a process, component (the upper arm muscle is ...) or amount (the longest river in Africa is ...) from memory without having to perform any interpretation.	20%	Alignment with HEQF level descriptors	0	1	(2)
Complex recall of extended definitions, complex processes and explanations which would also not require interpretation but the question would require a longer more detailed answer, for example giving a related account of steps to set up a business or perform a fault analysis.	10%	Alignment with subject outcomes	0	1	(2)
Application of knowledge to solve simple, familiar problems which would involve few variables and the task would be very similar to what had been taught (for example a simple calculation or case study analysis). The student would still, however, be required to analyse the problem into its components and to synthesise knowledge to reach a solution, though at a simple level.	30%	Integration of critical cross-field outcomes	0	1	(2)
Application of knowledge to solve more complex and unfamiliar problems. This is distinguished from more simple problem solving where there are more variables and/or the student has to apply their knowledge to a new context, rather than one that has previously been taught. Furthermore, the student would be required to perform a more difficult analysis of what the problem involves and what knowledge would need to be synthesised to address a solution (this could be a complex, multi-stage calculation or a more challenging case study).	20%	Clarity of instructions and questions	0	1	(2)
Simple critical analysis in which the student is asked to pass judgement, give reasoned opinion on and make suggestions towards, for example, an issue, procedure or approach with reference to the typical knowledge and procedures of the field. This could be done through asking students to comment on issues or approaches in a short case study. At lower levels (for example year 1) this would typically be similar to what has been taught involving relatively few variables.	15%	Accessibility of language	0	1	(2)
More complex critical analysis would involve students' operating in a relatively unfamiliar or new context with an increased number of variables.	5%	Time allocation	0	1	(2)
Total	**100%**				

(Adapted from Bloom's taxonomy to incorporate the SAQA level descriptors)

Table: levels of complexity of assessments

1.	Was the assessment task moderated before the students completed the assessment?	Yes
	Comments: Looks fine.	
2.	Is the assessment task (test, oral, practical, project) and memo/assessment criteria set at an appropriate HEQSF level?	Yes
	Comments:	
3.	Is the allocation of marks in proportion to the complexity of the questions?	Yes
	Comments:	

Cape Peninsula University of Technology · Appendix 2: Comprehensive Moderation Report PHE261S T2 · Page 1 of 4

SECTION 2 (Post-assessment): Jointly completed by the Examiner & Subject Moderator/s

PHE261S	**Pre-Hospital Emergency Care-Medical 2**		
Total number of (reg.) candidates	40	**No. of candidates absent:**	11
Highest mark obtained:	71.0%	**No. of passes:**	13
Percentage pass:	44.8%	**Average mark (%):**	48.3%
Type of assessment:	Written test		

1.	Which types of questions/project assessment criteria (see Table 1) did most students not meet?
	Comments: Questions on drug calculations and airway management.
2.	Comment on the pass-rate (above), and any other indicators (e.g. student evaluations) as to how students fared in this assessment.
	Comments: Consistent with the class average; two students were absent with medical certificates.
3.	Have the pass-rate and other indicators changed significantly compared to previous assessments this semester?
	Comments: No significant change compared with the previous test.
4.	What was done differently in the approach to this subject this semester/year, and how effective was it?
	Comments: A revision session was added before the test; it was effective.
5.	What should be done differently next time this subject is taught and assessed?
	Comments: Add more worked examples on drug calculations.
6.	Is the marking of the assessor up to standard, accurate, fair, consistent?
	Comments: Yes. Marking is accurate and consistent with the memorandum.
7.	Is the marking of the assessor recommended for acceptance?
	Comments: Yes, recommended for acceptance.
8.	Please comment on the following:

The extent to which the assessment tasks cover the outcomes/content of the subject, in proportion to its relative importance.
No concerns.

Whether the assessment tasks are at the appropriate level of difficulty (standard) for the exit level of the subject.
No concerns.

Whether the assessment tasks have industry/professional relevance.
No concerns.

The reliability of the assessment process (i.e. consistent marking, accurate results, detailed memorandum, comprehensive assessment criteria).
No concerns.

The validity of the assessment methods and instruments (comment on whether it measures the selected content/practical skills and learning outcomes it intends to).
No concerns.

The quality of the feedback given to the students (not required for final summative assessment).
No concerns.

Are any general adjustments of the marks recommended? **No**

Specify:

DECLARATION: Consensus has been reached between the Examiner and the moderator/s

NAME: Examiner (please print)	SIGNATURE	DATE
Examiner One		04/11/2026
NAME: Internal Moderator (please print)	**SIGNATURE**	**DATE**
Moderator One		04/11/2026
NAME: External Moderator (please print)	**SIGNATURE**	**DATE**
External Moderator One		04/11/2026

Cape Peninsula University of Technology · Appendix 2: Comprehensive Moderation Report PHE261S T2 · Page 3 of 4

- Same layout as the official Appendix 2
- Chosen ratings circled, as on paper
- Signatures of everyone who signed
- Document fingerprints and an audit reference
- Downloadable from the record by those involved

TRUST

Safe by design

Who can see what

- A record is visible only to its examiner, internal moderator and subject HOD
- The external moderator sees it after Gate 2
- Staff registrations are approved by the HOD

Signing

- Drawn signature plus password at every sign-off
- A signature is tied to the exact content signed
- Passwords can be changed by each person

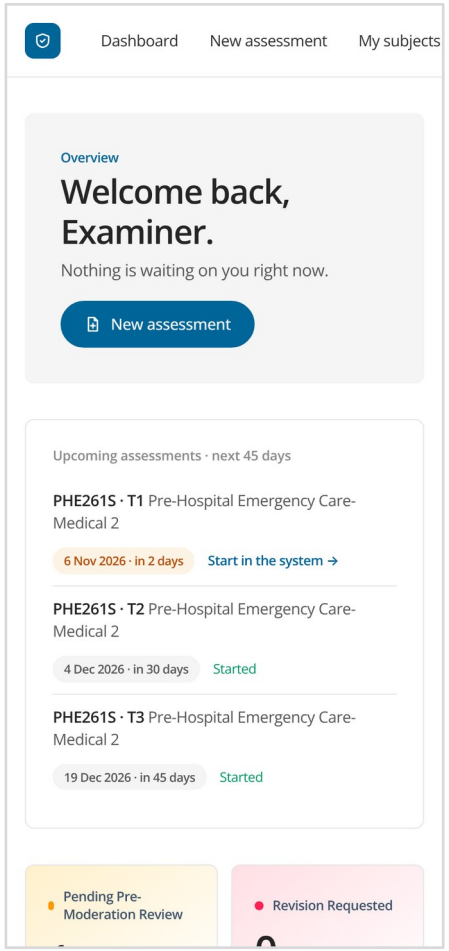

Audit

- Every action is logged with time and person
- The log is chained so edits are detectable
- Uploaded files are fingerprinted

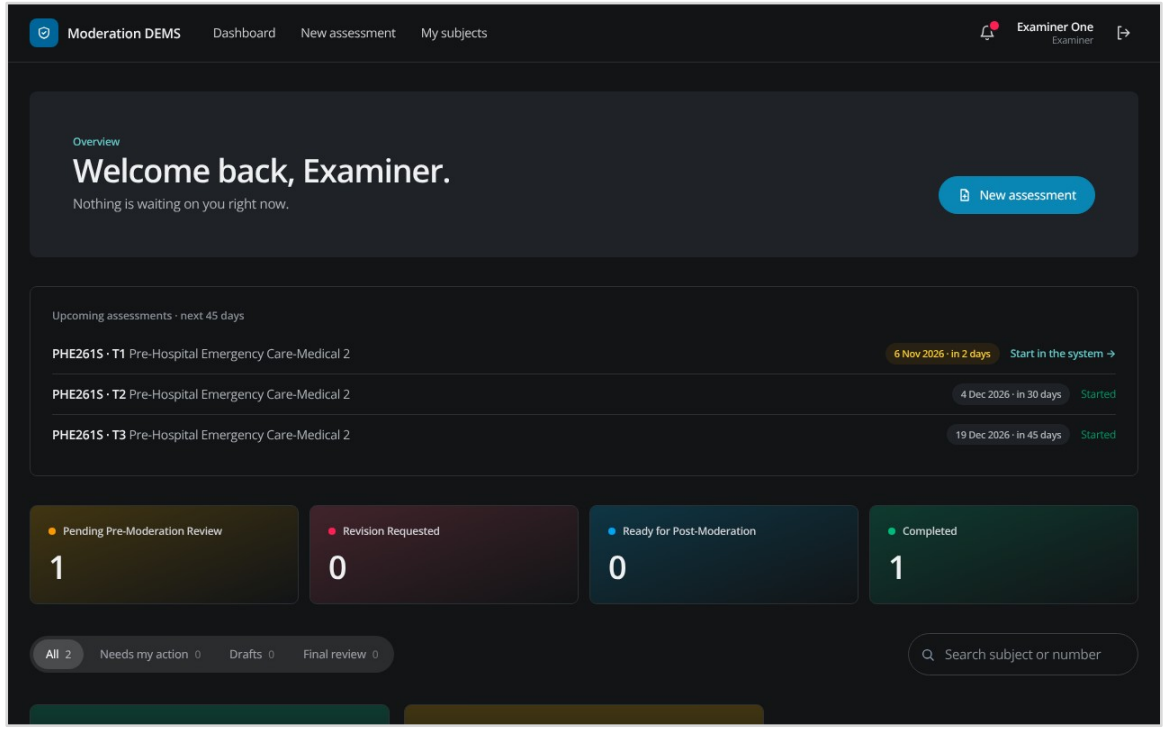

Every sign-off asks for the drawn signature and the password again: nobody can sign for someone else.

ACCESS

Works on any device

Phone

Dark mode

- Phone, tablet or computer
- Light and dark themes
- No software to install

ROADMAP

What comes next

Under consideration

- An optional AI check of the question paper against the Section 1 criteria (advisory only; needs a confidentiality decision first)
- E-mail notifications in addition to in-app reminders
- Linking supplementary assessments to the test they replace

Your feedback shapes this

- What is confusing or slow?
- What is missing from the form?
- Which reports would you like to see?

NEXT STEPS

Getting started: your checklist

1. Register on the site and wait for approval
2. Open My subjects: tick your subjects
3. Enter your test dates and your usual moderator
4. Start each assessment when you are ready, with the right date
5. Follow the prompts; the dashboard shows whose turn it is
